Daily Standup Meeting

Project Name: Aircraft Flight Management System (AFMS)	Group Name: Elite Coders
Sprint Number: 1	Date and Time: January 30th 2026 14:15

List of attendance:

- Name: Muhammad Waleed Aamir Attended? YES
- Name: Mohammed Sheekh-Amin Attended? YES
- Name: Schneider Rodrigues Attended? YES
- Name: Abdullahi Ibrahim Attended? YES
- Name: Amin Mubarek Attended? YES

Project Progress:

Team Member (1): Muhammad Waleed Aamir:

1. What did you accomplish yesterday?
   Answer: Created a GitHub repository and added all team members in the repository to get started.

2. What will you do today?
   Answer: Create a mind map to get things started ASAP using the waterfall methodology for maximum efficiency.

3. What obstacles are impeding your progress?
   Answer: Figuring out which programming software is most efficient and effective for the development since not everyone is operation on the same OS.

Team Member (2): Mohammed Sheekh-Amin:

1. What did you accomplish yesterday?
   Answer: Started development of the front-end of the application

2. What will you do today?
   Answer: Using the designs on Miro will progress in these designs and get as much done as possible

3. What obstacles are impeding your progress?
   Answer: Still not confident in C# yet

Team Member (3): Schneider Rodrigues**:**

1. What did you accomplish yesterday?
   Answer: Worked on wireframes using Miro

2. What will you do today?
   Answer: Finalize the wireframe to have one final design

3. What obstacles are impeding your progress?
   Answer: Development software being overly complicated on mac operation system

Team Member (4): Abdullahi Ibrahim**:**

1. What did you accomplish yesterday?
   Answer: I began reviewing and exploring different layout and visual approaches, focusing on how the final product should look and feel overall.

2. What will you do today?
   Answer: I will continue refining my designs, building on the concepts explored yesterday and working toward a more cohesive direction.

3. What obstacles are impeding your progress?
   Answer: Reaching alignment and agreement on certain design decisions is currently slowing progress.

Team Member (5): Amin Mubarek**:**

1. What did you accomplish yesterday?
   Answer: Started the report for the application and liaised with developers for first design sketches

2. What will you do today?
   Answer: Continue with introduction of report and think about infrastructure for deployment

3. What obstacles are impeding your progress?
   Answer: Features of application not decided so waiting on it to continue with report

"Alone we can do so little; together we can do so much." – Helen Keller
